<u>Tuesday 19th January</u>

<u>Remote learning – maths</u>

<u>Speed number bond challenge</u>

Using the number line, you created yesterday, have a go at these calculations (sums). You may recognise this sheet as one you used with Mr Franklin in year two... this is your time to shine. Can you do even better than last year? Can you answer these quickly?

Please remember to breakdown numbers if this helps you, for example:

5

3 + 2

This can be used for bigger numbers, for example: 11

11

10 + 1

Or

12

6 + 6

Use your number line and characters to support you as well as these methods.
Please have fun with these, we will talk about them in our learning on Wednesday.
