Art Remote Learning

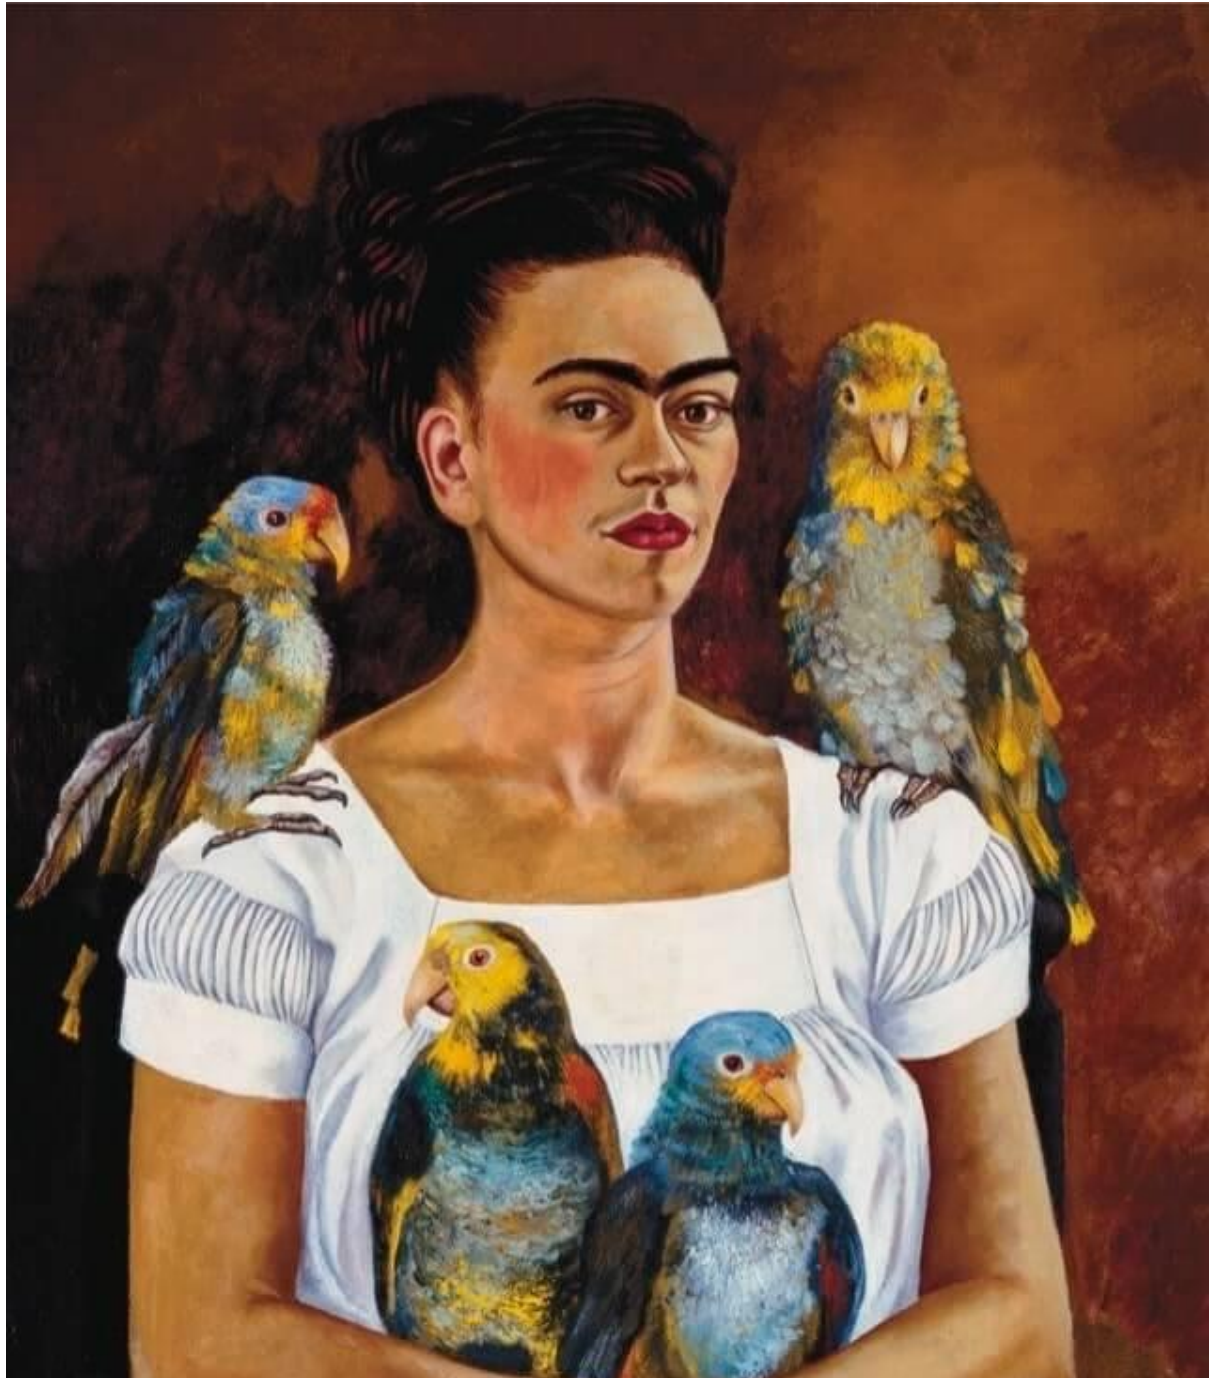

Portraits and Frida Kahlo

This artist used her emotions in her art, maybe you have tried this yourself. This picture of her as a Deer depicts (shows) how she was feeling after back surgery.

Frida expressed (showed) how much pain she was in at the time.

Frida often used animal in her portraits to show (depict) her feelings and emotions. You might see how the expressions of the faces on the animals mirror her own!

If you could depict (draw) your own portrait as an animal to show your own emotions and feelings, what would it be?
