Shadow pictures

It's finally Friday, so let's explore some ways to create pictures using light.

How many times have you changed how your shadow appears? When I was a child I used to hold my coat hem in my hands, raise my hands above my head (still holding my coat) and create a "bat signal" shadow.

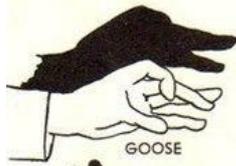

Using your hands, body, and objects how many different shadows can you find?

Your challenge is to draw them.

Much like this.

Here are some shadow hand puppets for you to try to make using a light source.

GOOSE

WOLF

GOAT

ELEPHANT

HARE

TEDDY BEAR

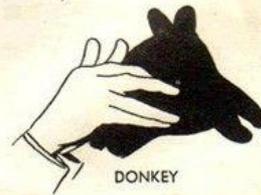

OX

DOG

BUTTERFLY

DONKEY
