LI: To learn about the four cardinal compass points by playing a maze game.

Compass Game

Find your way through the maze by using the points north, south, east and west.

You are the image in the bottom right hand corner of the map. Remember that that map is looking from the top down (a birds-eye view) so you can see the top of the persons head and shoulders - you might need to look carefully!

Write down the list of directions you need to take to find your way through the maze
