Maths Remote Learning  
(Counting Backwards to Subtract)

If you are completing this task, you are confident in your Number Bonds, Counting and Adjusting and Partitioning.

We are consolidating our learning of counting backwards to subtract. This is not a new method; this is something we learnt last year. As you make your way through the questions, they will get increasingly more challenging. Complete the ones that you are comfortable with.

Remember to use your number bonds. We've been practicing jumping to the nearest 10 and then subtracting the rest in sensible jumps.

Here's an example:

$$142 - 37 =$$

1.  $39 - 13$

14.  $381 - 195$

2.  $72 - 41$

15.  $825 - 769$

3.  $63 - 29$

16.  $265 - 178$

4.  $99 - 53$

17.  $2798 - 1658$

5.  $165 - 42$

18.  $8524 - 3387$

6.  $123 - 64$

19.  $1369 - 1118$

7. 681 - 425

20. 4687 - 3267

8. 354 - 217

21. 7416 - 4403

9. 954 - 741

22. 9856 - 7954

10. 297 - 182

23. 4628 - 3965

11. 716 - 308

24. 7463 - 1395

12. 934 - 167

25. 1268 - 1139

13. 716 - 398

26. 5238 - 1248
