

Natural Disasters

Across

5. When the land starts to sink into the ground
11. A storm in shape of a spiral that is similar to a cyclone
12. When snow falls off a cliff in multiple turns
14. A storm similar to a blizzard but more snow is involved
15. A fire that gets out of control and hurts anything it touches

Down

1. When there is heavy rainfall and it gets out of control
2. When a volcano erupts
3. A cold storm normally in the coldest parts in the world
4. A disaster that shakes the Earth
6. A fire that happens in nature areas
7. When there has not been any rain for a long time
8. A huge wave caused by an ocean-floor earthquake
9. A whirling storm caused by the wind
10. A storm that normally happens in the desert
13. A storm that takes you and spins you around
